ACKNOWLEDGMENTS

We thank Wangxue Chen, National Research Council Canada, Institute for Biological Sciences, Ottawa, Ontario K1C 2M7, Canada, for interpreting the pathology results presented in Fig. 1. The technical assistance of Elizabeth Lawlor, Department of Microbiology, George Washington University Medical Center, is duly acknowledged.

This work was supported by NIH grant AI33325 awarded to I.A.K. Some research funds for this study were provided by Trudeau Institute, Saranac Lake, NY.
